"Bonnie."

IT IS EASY TO OPERATE. * * *

* * * IT IS OF LIGHT DRAFT.

1

No matter how high stands the stout waving wheat,

No matter how low it may lie on the ground,

The "Bonnie" will cut it and bind it up neat,

Excelling all binders the wide world around.

W

IS THE LOWEST ELEVATOR BINDER.

There is a very great saving of power as compared with
the use of higher elevators
THE DRIVE WHEEL is high and wide and of great trac-
tion power, and this, with the very low elevator, makes
the "Bonnie" the lightest draft binder in the field.
THE SEAT IS LOW DOWN. The operator has not to
reach and climb, but steps easily from the ground into
the seat
THE LEVERS are used with the right hand and are located
very conveniently
THE TILTING up or down is done with perfect ease and
the binder is always well balanced
THE REEL on the "Bonnie" is the acme of perfection. No
other reel has equal scope and ease of adjustment forward
and backward, up and down, all accomplished with a
single lever

THE DECKS have a steep slant and the grain moves easily to the packers.

The "Bonnie" always elevates the grain and does it easily.

Two horses handle it with perfect ease.

Right hand cut.

Patent Whipping Device.

A NOVEL FEATURE. * * * * *

IT IS VALUABLE BECAUSE USEFUL.

OUR Patent Whipper leaves the operator's hands always free to drive the team and use the levers. He simply pulls a rod and cracks his whip or touches the near or off horse at will.

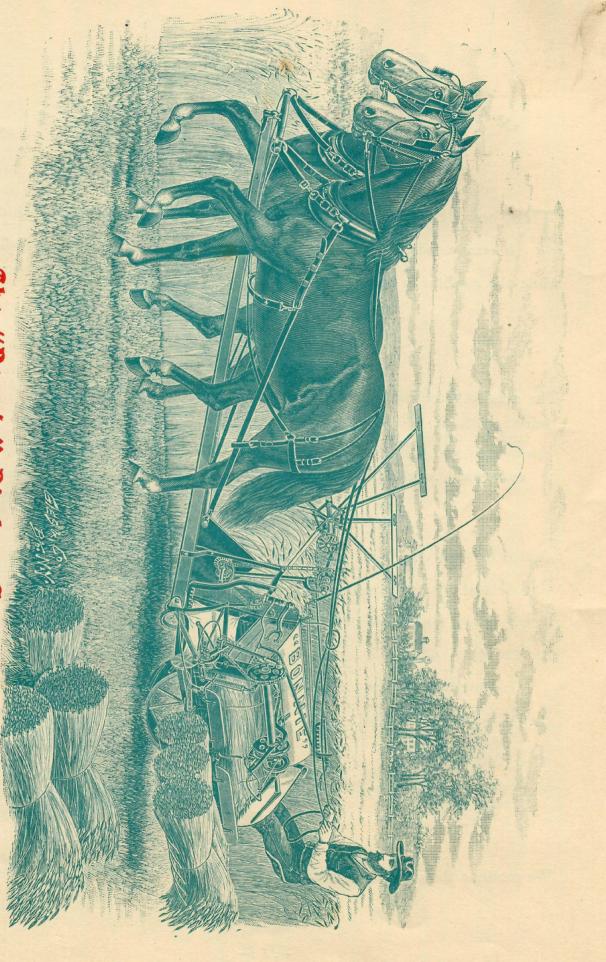

This ingenious device for holding and using the whip will captivate all who use the "Bonnie." It will be found only on our binders.

Ol the Whipping Device, 'tis the handiest thing That e'er was invented; by pulling a spring, The whip flies about with a swish and a crack, Or falls on the team with a business-like whack. Our binders, alone, have this Whipping Device; Once used it is valued beyond any price.

Che "Bonnie" Binder, Complete.

che New "Bonnie." & &

THE new "Bonnie" has a convenient platform wing or flag, which is easily adjusted forward or backward by the operator, at will, while the machine is in motion.

The simplest mechanism that ever bound grain, and as certain as it is simple. It is an economical knotter. It always ties.

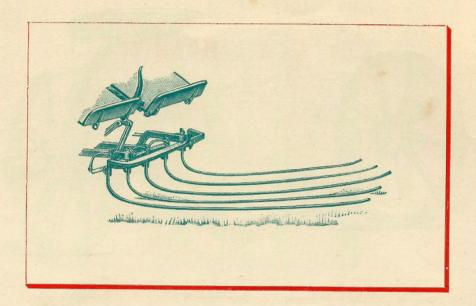

THE LATEST AND BEST

TRIP THAT IS

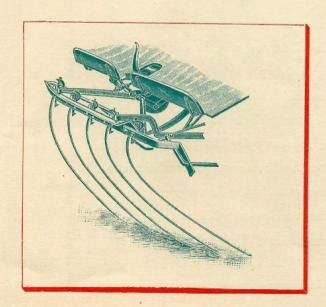

PERFECTLY RELIABLE.

We continue the use of the chain drive, which we were the first to introduce.

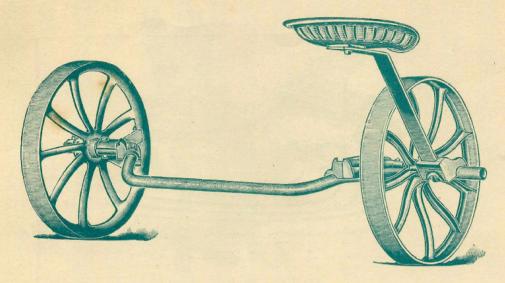

Steel Bundle Carrier

The steel fingers fold back against the machine and will avoid all obstacles.

There is no carrier made that is superior to this one.

Che "Bonnie" Cransport Cruck.

THE MOST CONVENIENT TRANSPORT MADE. * *

🚁 🧀 IT IS STRONG, SAFE AND HANDY.

How changed are the scenes on the farm of my childhood,

Since all the old days when I drove home the cows;

Now gone are the thickets and "deep tangled wild wood,"

The clumsy old cradles and old-fashioned plows;

Now through the tall grass of the wide-stretching meadows,

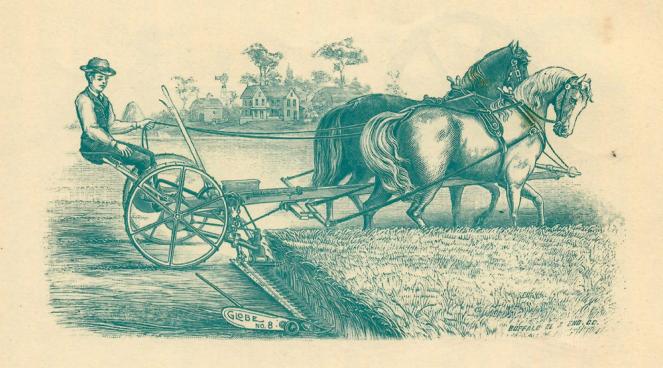

The sharp cutting mower goes sweeping along;

And through the bowed wheat, swift as summer cloud shadows,

The new "Bonnie" Binder goes singing its song—

The strong "Bonnie" Binder, the low-seated Binder,

The Binder We've Dreamed of and Waited for Long.

Che "Globe" Mower no. 8. 🚜 🚜

IT IS BUILT TO BE DURABLE.

THE "GLOBE" IS AN EASY RUNNING MOWER.

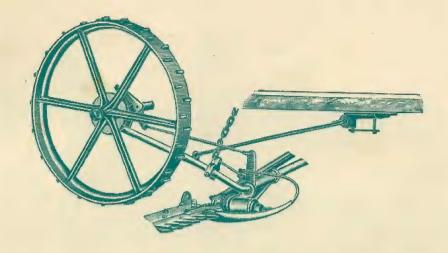

IT IS A POWERFUL CUTTER.

THE "GLOBE" HAS A VERY WIDE TRUCK.

IT HAS LARGE AND SIMPLE GEARING.

THE "GLOBE" HAS FOOT LIFT AND SPRING LIFT.

IT HAS A PERFECT TILT.

NOTE THE MANNER IN WHICH DRAFT ROD IS ATTACHED.

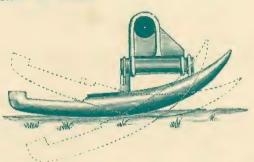

Whiffletrees are attached to a sliding hammer strap under the pole. We secure the easiest possible draft.

Our line of draft is from the center of the line of resistance.

No side draft can occur.

We use a complete rocking bar, and have the strongest hinge connection to cutter bar.

The drag bar is constructed with a swivel to adjust the bar forward in case of wear.

The shoe is perfectly adapted to easy and smooth work on uneven ground.

WE USE A LONG PITMAN

ON THE MOWER.

NOTICE THE PITMAN CONNECTIONS
AND THE BOX.

Globe & & Mower No. \$

5 feet. 6 feet. 7 feet.

Before You Buy a mower get on the seat of the "Globe" Mower No. 8 and try the foot lift.

たりにつにつにつにつぶつぶつぶつぶつぶつ

The "Globe" is built with solid frame,

Its truck is wide and strong,

Its even motion wins it fame,

Its speed is never wrong.

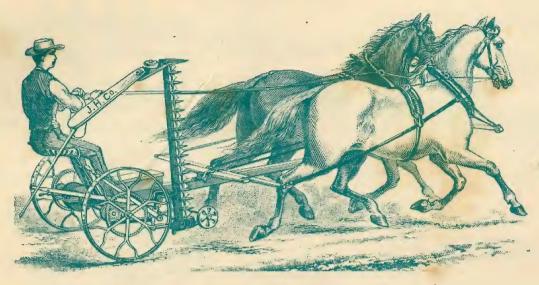

The lift is done by foot and spring,

And good and sure its tilt—

In fact it is a perfect thing,

The best of Mowers built.

"Continental" Mower no. 6.

A CHANGEABLE SPEED MOWER OF GREAT UTILITY AND SUPERIOR STRENGTH.

mowers.

* TWO SETS OF GEARING. * *

ONE shifting lever moves the clutch which engages one set and releases the other. All the gearing is correctly constructed.

THE "CONTINENTAL" NO. 5 & &

* * IS OUR REAR CUT MOWER.

SIZES: 4 FEET 6 INCHES, AND 5 FEET.

It also has two speeds and all the good points of the No. 6.

A changeable speed has our No. 6 Mower,

When rapid its gait it can change and cut slower;

This feature, with others the Mower can boast,

Has made it, in all lands, a conquering host.

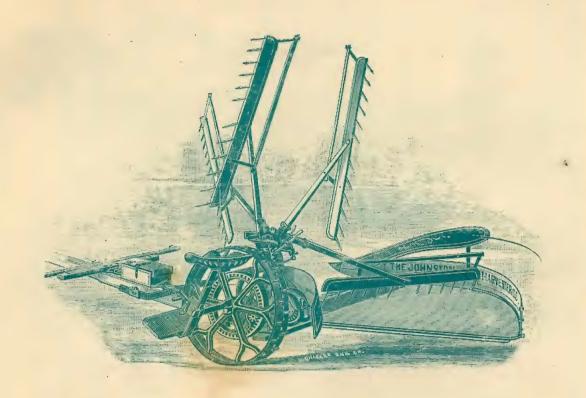

The "Mayflower" One-horse Mower.

T OPERATES easily, and is not a two-horse mower simply fitted with thills instead of a pole, but is a specialty much smaller and lighter than the ordinary mower. In orchards, parks, lawns or on the small farm it is especially useful. It has enclosed gearing, a good tilt, perfect rocking bar, and is elegantly finished.

Dinaple. Light,

Matightal Flowers

The Thistle blooms for Scotland,
Where Burns' great name is dear;
The Rose for merry England,
Her stately homes to cheer;
The Shamrock for old Ireland,
On Erin's flag unfurled;
The "Mayflower" for all of them,
And all the wide, wide world!

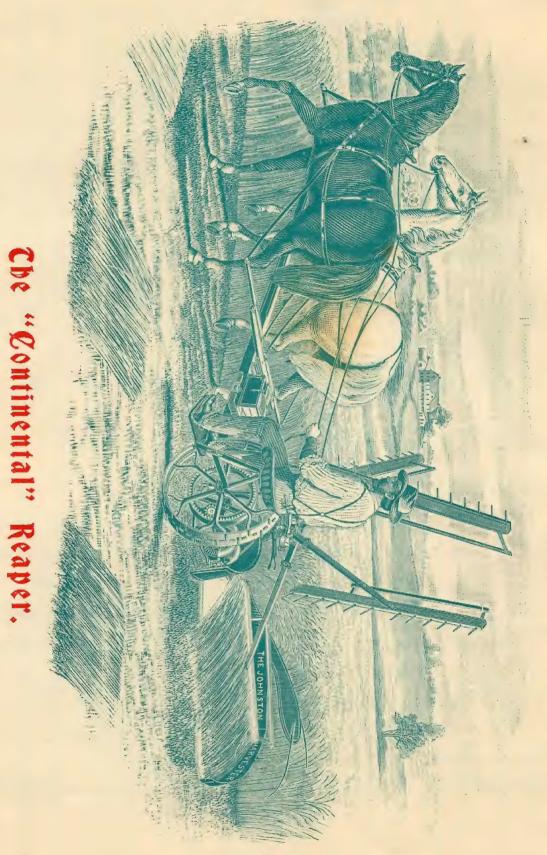

THIS is the best light reaper in the world.

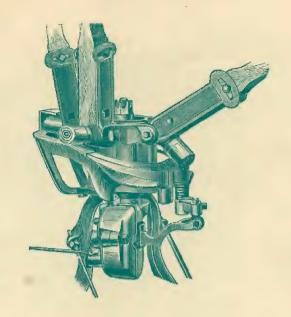

It is easily distinguished by its high standard.

AS the rakes revolve, when they reach the finger bar they are parallel with it the whole length; the grain is thus evenly laid on table, and gavel when discharged is square and in best shape for binding. . .

-; 17 :-

Che "Continental" Reaper

IS PROVIDED WITH

BOTH AUTOMATIC AND FOOT TRIPS.

HE automatic trip, which is within easy reach of the driver's hand, is a simple patented device by which every second, third, fourth or fifth rake can be made to sweep the platform at his option. The delivery of a gavel can be prevented at any time in turning corners or in thin grain (it is always under the driver's control).

By using the swathing switch every rake will sweep the table.

The platform is easily folded after removing the inner divider.

There is no weight on horses' necks.

Every machine is set up and thoroughly tested before leaving our factory.

"Bonnie" • • Binding Twines.

We furnish the best twines made. . They are produced by skilled twine makers from carefully inspected fibres.

OUR twine manufacturers use the best cording, spinning and balling machinery in the world. The twines are new, reliable and fully guaranteed. The strength of the twine and the number of measured feet to the pound are as represented.

Do not be tempted by cheap twine, for there is no economy in its use.

You may lose dollars in twine by looking only at the pound price.

The "Continental" Disk Cultivator.

. . FOR . .

CORN AND COTTON CULTURE.

SPRING PRESSURE LEVELERS & & &

* * * * FURNISHED IF DESIRED.

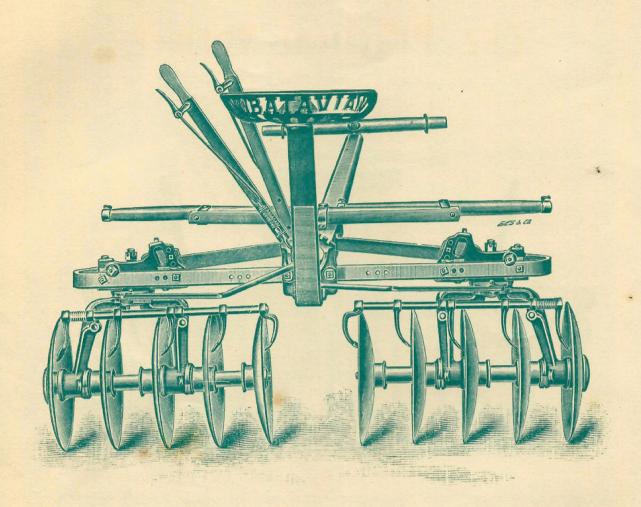

EASY AND QUICK ADJUSTMENTS.

The "Continental" Disk Pulverizer.

THE ONLY PULVERIZER WITH SOLID & & &

* * STEEL WEIGHT BOXES (PATENTED).

~Pulverizer.

the "Diamond" * THROWING THE SOIL & & * * TO THE CENTER.

THE BEST IMPLEMENT IN THE WORLD FOR THE & & ORCHARD, VINEYARD AND ORANGE GROVE.

REVERSIBLE AND ADJUSTABLE.

It throws the soil to or from the vines without harming the tender roots. 'Twill lay by your grape roots in the fall without the plow. With its levers you can quickly and easily adjust the disks to cut deep or shallow; deep in the center and shallow at the ends; to cut at any angle. For side-hill work it is the Best of All Pulverizers on the Market. . . .

THE DIAMOND IS A GEM: 'TWILL CUT ITS WAY TO FAVOR.

Che Practical Farmer.

HE WILL NOT USE OLD IMPLEMENTS, * * * *

** FOR IT DOES NOT PAY.

HE WILL buy our improved machines, so that he can afford to grow crops even at the low prevailing prices.

Better times are coming to those who give attention to scientific soil cultivation and use improved farm machinery.

& & Che Practical Farmer. &

He rides the "Continental" Disk to pulverize the soil,

He rides the Mower No. 8 and lightens all his toil;

And when the harvest time comes 'round, upon an easy seat,

He rides the "Bonnie" Binder through the heavy, tangled wheat.
